

Congratulations on your admittance to Vermont State University's Professional Pilot Technology program!

Please read the following important information regarding requirements for entry into the program:

- A clear, unrestricted, First or Second Class Medical Certificate issue by an FAA certified Aviation Medical Examiner (AME) is a requirement for admission into this degree program. Locating and scheduling an FAA Physical may be time consuming; applicants are encouraged to do this as soon as practical.
- A background check and fingerprinting is required for students to receive their Security Identification Display Area badge (SIDA) for flying out of the Burlington International Airport. Vermont Flight Academy is responsible for assisting students with this during orientation.
- Short interview with Professional Pilot Technology program director Robin Guillian. Please email [robin.guillian@vermontstate.edu](mailto:robin.guillian@vermontstate.edu) to make arrangements.
